

# CS418B<sup>®</sup> MCLAUGHLIN SERIES CORE SAW

### PIVOT BASE.

Telescoping and extendable arm allows for infinite positioning of the bit.

### MAST WITH DEPTH GAUGE.

Bit travel range of 24" of vertical movement. Keep track of jobsite progress with depth gauge.

### PROVEN POWER.

Kohler 25 hp EFI engine for improved fuel efficiency, reliability, starting dependability and featuring a heavy duty air cleaner.

### CONTROL PANEL.

Allows for infinite hydraulic control of bit speed, rotation and travel. Two hydraulic gauges show the operator the down-force pressure and bit RPM. The dual speed motor allows for a greater speed range supporting various bit diameters and surface conditions.

### LEVELING JACKS.

Dual jacks allow for vertical placement of bit featuring a level located on the front of the machine for precise positioning.

### WATER SYSTEM.

100 gallons available for cooling bit with variable flow from 0-2.8 gallons per minute.
